

Broker, MT5 & Payments

Integration Questionnaire

To wire real-money deposits, withdrawals, and MT5 trading we need to know how your broker relationship and payments work. Please answer every question. Questions 1-4 are the most important — they decide the entire architecture.

Prepared for

Date

Section 1 — Broker Relationship & Licensing (deal-breakers)

1. Are you a licensed broker yourselves, or do you work through a partner broker?

Yes — we are licensed (regulator + number)

No — we partner with a licensed broker

No — neither yet

2. If partnering, which broker, and under which regulator / jurisdiction?

3. Whose company name is the "merchant of record" on the client's card statement / bank receipt?

Ours

The broker's

Not sure

Note: If you are NOT the broker, you generally cannot collect and hold client deposits yourself without becoming a regulated payment intermediary. Q1-Q3 decide whether deposits flow through the broker or through you.

Section 2 — MT5 Access & Trading

4. How do we access MT5?

Broker MT5 Manager / Admin API

MetaApi.cloud access

A white-label MT5 we control

Clients' own MT5 logins

Not sure

5. Can we CREATE new MT5 accounts programmatically, or only LINK existing ones?

Create new accounts via API

Link existing accounts only

Not sure

6. Can we place / close orders via API on the client's behalf, or is trading done only inside MT5?

Place/close orders via API

View only — trading happens inside MT5

Not sure

7. Do we get live balance, equity, positions, and price feed via the broker API or MetaApi? (which?)

8. Any leverage, instrument, or symbol restrictions the broker enforces?

Section 3 — Deposits (money in)

9. Does the broker provide a deposit / cashier page or API we can redirect to or embed?

Yes — hosted cashier page

Yes — cashier API

No

Not sure

10. Which payment methods must be supported?

Credit / debit card

Bank transfer

Netbanking

UPI

E-wallets

Crypto

Other

11. Which countries and currencies are the clients in?

12. Is there an existing payment gateway / PSP account, and in whose name? Can it legally process trading-account funding?

13. When a client deposits, who credits the MT5 account and how fast?

Instant via API

Manual by the broker / finance team

Not sure

14. Is there a minimum deposit or any deposit fees?

Section 4 — Withdrawals (money out)

15. Who pays withdrawals back to the client's bank?

You (our company)

The broker

Not sure

16. What is the withdrawal approval process (who approves, time, limits)?

17. Must withdrawals go back to the same source the client deposited from?

Yes — same source required

No

Not sure

Section 5 — KYC / AML / Compliance

18. Who performs and stores KYC (ID, address, selfie)?

Our platform

The broker

Shared / both

Not sure

19. Is trading blocked until KYC is approved, and who decides?

20. Are there prohibited countries or client types we must block?

Section 6 — Commercials

21. How do you earn revenue?

IB rebates / commission from the broker

A markup we add

Both

Not sure

22. Who calculates and pays your revenue, and how often?

Useful attachments (if available)

Broker partnership / IB agreement (Q1 / Q2)

Broker or MT5 API documentation + sandbox credentials (Q4 / Q7)

Payment gateway / PSP account confirmation, with merchant name (Q3 / Q12)

Brokerage license (only if you are the licensed broker — Q1)

Once these are answered, we lock the architecture: an IB/portal that links to the broker (never touches money), a front-end over the broker's cashier API, or a model that requires you to be licensed.
