

Trading Web Application

Client Discovery Questionnaire

Real-money trading platform. Please complete all sections. Items in Sections 2-4 require supporting documents (license, broker agreement, payment processor) before development can begin.

Prepared for

Date

Section 1 — Business & Scope

1. Company / brand name

2. Instruments to be traded (tick all that apply)

☐ Stocks / equities

☐ Forex

☐ CFDs

☐ Crypto

☐ Options

☐ Futures

☐ Commodities

☐ Other

3. Target users (retail / professional / institutional / internal)

4. Countries/regions you operate in and accept clients from

5. Primary goal of the platform

☐ Marketing website + client portal

☐ Full trading terminal with live execution

☐ Both

6. Existing platform/codebase to build on or replace?

Section 2 — Legal, Licensing & Compliance (required before build)

7. Are you a licensed broker/financial entity?

☐ Yes — license attached (regulator + number)

☐ No — we partner with a licensed broker

☐ No — neither yet

8. If partnering, which broker? (attach partnership / IB agreement)

9. Which regulator(s) govern you? (e.g. SCA, DFSA, ADGM/FSRA, other)

10. Who is legally responsible for holding/safeguarding client funds?

11. KYC/AML requirements & preferred vendor

- ☐ Sumsub ☐ Onfido
☐ Jumio ☐ Other
☐ Need a recommendation

12. Data residency / privacy obligations (where must data be stored?)

Note: We cannot build a system that holds client money or executes real trades without proof of a valid license or a licensed-broker partnership (Q7/Q8). This protects both parties.

Section 3 — Trading Execution & Market Data

13. Which broker / liquidity provider / exchange will EXECUTE trades?

14. Can you provide their API documentation and sandbox credentials?

15. Real-time market data provider, and who pays for the feed licenses?

16. Required order types (market / limit / stop / stop-limit / trailing)

17. Charting expectations (TradingView library — licensed — or lighter)

18. How are leverage, margin, spreads, and commissions configured?

Section 4 — Funding & Money Movement

19. Deposit/withdrawal methods

- ☐ Bank transfer ☐ Cards
☐ Crypto ☐ E-wallets
☐ Other

20. Payment processor(s) / PSP — do you already have an account?

21. Where will client funds be held (bank / custodian)?

22. Withdrawal rules (approvals, limits, processing times)

Section 5 — Features & User Experience

23. Account types/tiers offered and how they differ

24. Onboarding flow (registration -> KYC -> approval -> funding)

25. Required client portal features

- | | |
|--|--|
| ☐ Dashboard / KPIs | ☐ Deposit / withdraw / transfer |
| ☐ KYC upload & status | ☐ Downloads |
| ☐ Support tickets | ☐ Profile & settings |
| ☐ Other | |

26. Need an admin / back-office panel? (users, KYC approval, reporting)

27. Notifications required

- | | |
|---------------------------------|-------------------------------|
| ☐ Email | ☐ SMS |
| ☐ In-app | ☐ Push |

28. Languages to support

Section 6 — Technical & Operational

29. Existing systems to integrate (CRM, broker backend, analytics)

30. Hosting/infrastructure preferences, and who owns/pays for it?

31. Security expectations

- | | |
|---|---|
| ☐ 2FA | ☐ Encryption at rest |
| ☐ Penetration test | ☐ Other |

32. Ongoing maintenance and support after launch required?

Section 7 — API Access & Credentials

Note: Generating API keys is free, and all SANDBOX/TEST keys are free to use. We build and test the app on sandbox keys. Production (live) keys are issued against your own licensed accounts and are provided near launch.

33. Sandbox / test credentials you can provide now (tick all available)

- | | |
|---|--|
| ☐ Broker/exchange sandbox API key + secret | ☐ Market data test key |
| ☐ KYC vendor sandbox key | ☐ Payment gateway test keys |
| ☐ None yet — need guidance | |

34. Who will provide the PRODUCTION (live) credentials at launch, and when?

Section 8 — Third-Party Running Costs (Client Responsibility)

Note: The following are recurring operating costs billed to your own accounts — they are the client's responsibility, not part of the development fee. Development uses free sandbox services; these costs begin only when the platform goes live.

35. I acknowledge the following live-service costs are the client's responsibility

- | | |
|---|---|
| ☐ Market data feed (monthly license) | ☐ KYC/AML checks (per verification) |
| ☐ Payment processing (per-transaction fee) | ☐ Email / SMS notifications |
| ☐ Hosting & infrastructure (monthly) | ☐ Charting library license (if commercial) |

36. Authorised signatory name & signature (acknowledging the above)

Section 9 — Engagement Terms & Developer Protection

Note: This engagement is for software development services only. Core Care Consultancy builds the application; it is NOT a broker, financial advisor, or party to any trade. The client is solely responsible for licensing, regulatory compliance, KYC/AML, and custody of client funds.

37. Documents the client will provide before development begins

- | | |
|---|--|
| ☐ Company trade license / registration | ☐ Brokerage license OR broker partnership agreement |
| ☐ ID & proof of authority of signatory | ☐ Signed development contract |

38. The client acknowledges and agrees that:

- ☐ Compliance, licensing & fund custody are the client's responsibility
- ☐ Core Care Consultancy provides software only — no financial/legal advice
- ☐ Liability is limited to fees paid; no liability for trading or fund losses
- ☐ Client indemnifies the developer against end-user or regulator claims
- ☐ Developer is not liable for third-party outages (broker, data, payments)
- ☐ Scope changes require written change requests
- ☐ Code ownership transfers on full payment

39. Payment terms agreed (deposit %, milestones, final payment)

Required attachments (before development begins)

- ☐ Company trade license / registration (Q37)
- ☐ Brokerage license OR licensed-broker partnership agreement (Q7 / Q8)
- ☐ Broker/exchange API documentation + sandbox credentials (Q13 / Q14 / Q33)
- ☐ Payment processor details / account confirmation (Q20)
- ☐ Signed development contract (Q38)

Once this form is completed and the required documents are attached, we will prepare a detailed scope, architecture proposal, timeline, and quote.
